

Ratchet Handle

RH-2634

- Heavy duty curved ratchet handle which is fully reversible
- Quick release drive head with spring loaded ball bearings for locking sockets
- Higher quality, made from heat-treated chrome-vanadium steel for durable and longtime use
- Anti-slip and anti-oil soft grip handle for better control during working
- 180-degree flexible head that allows you to easily reach fasteners at almost any angle
- Chrome-plated surface for optimum corrosion protection
- A quick-release button on the back of the ratchet head allows effortless socket removal
- Curved design make it suitable for working in hard to access places
- 72-tooth reversible ratcheting mechanism that only needs a 5-degree arc to operate and drive direction
- The new design allows ease of movement in tight and confined places
