

Soldering Iron

RH-4416

- Ideal for soldering applications that require mobility or a long reach.
- Features a lightweight, ergonomic design that can be used comfortably.
- efficient ceramic heater provide accuracy and stability.
- Fast heat-up for high productivity
- mechanism to roll and position the tip easily when working.
- Constructed from materials designed to prevent deterioration and increase durability
- Includes a stand for holding the iron when not in use

Model	RH-4416
Power	40W
Output Temperature	2000°C
Weight	0.22KG
Preheat	3-5 min
Voltage	220v
Supplied in	Ronix color box
