

**REGULATOR**  
**180x70x220mm**

**RH-4510**

- The Oxygen pressure regulator is a compact precision device for control that does not require maintenance. Reduces and regulates the pressure of gases for welding work.
- Can be used for oxygen gas. Professional tool for commercial or occasional use. Suitable for many applications Lightweight and portable.
- The indicators on the pressure regulator Oxygen are specially clearly designed. The regulating on the pressure regulator is done with the regulator.
- Body made of high-quality brass, compact design, ideal for assembly
- This is Oxygen, Working pressure : Inlet 230bar, Outlet:10bar, Inlet thread W21.8-14, Outlet: G1/4 + 6-8 Nipple

Model	RH-4510
Size	180x70x220mm
Body material	Brass
Pressure gauge	Dual Scale Gauges
Weight	1.35kg
Supplied in	Color box
