

**DC Arc Welding Inverter**  
**200A, 9.5KVA**

**RH-4604**

- IGBT technology for better welding quality, greater welding penetration, reduced energy consumption and increased efficiency
- Equipped with fan(24V-0.7A) with special design in the impeller part in order to double the air volume and increase the device's operating time
- Unbeatable automatic short circuit current protection, easy ignition, less spark, provides excellent arc strike performance at rust surface
- Run 5mm MMA electrode
- Multi protection of over voltage, over heat, over current and over load protection
- Hot start, anti-stick, less spark, reliable, Ideal welding equipment for entry-level welder
- Equip with 2 volumes (Current, Arc force) for easy and better welding setting
- Digital display provides highly accurate welding
- Professional cooling system in order to increase efficiency and continuance welding

Model	RH-4604
Input Voltage	220V± 15%
No-load Voltage	65V
Out-put Current Range	30-200A
Rated Out-put Voltage	25.6V
Max Input Power Capacity	9.5KVA
Max in-put Current	43A
Power Factor	0.75
Duty-cycle (25°C)	60%
Insulation Class	F
Protection	IP21S
Electrode Diameter	1.6 - 5.0
Supplied in	Ronix color box
Accessories	Earth clamp+1.2m cable, Welding clamp+1.8m cable, Scotch brush+Hammer, Mask
