

DC Arc Welding Inverter
200A

RH-4611

- IGBT technology for better welding quality, greater welding penetration, reduced energy consumption and increased efficiency
- Unbeatable automatic short circuit current protection, easy ignition, less spark, provides excellent arc strike performance at rust surface
- Run 5mm MMA electrode
- Multi protection of over voltage, over heat, over current and over load protection
- Hot start, anti-stick, less spark, reliable. Ideal welding equipment for entry-level welder
- Equip with 2 volumes (Current, Arc force) for easy and better welding setting
- Digital display provides highly accurate welding
- Professional cooling system in order to increase efficiency and continuance welding

| | |
|--------------------------|---|
| Model | RH-4611 |
| Input voltage | 220V |
| No-Load voltage | 65V |
| Output Current range | 10-200A |
| Max Input Power Capacity | 8.2 KVA |
| Duty Cycle | 60% |
| Electrode Diameter | 1.6 - 5.0 |
| Supplied In | Ronix color box |
| Accessories | Earth clamp+2m cable, Welding clamp+2m cable |
