

Topline Arc/TIG Welding Inverter

11 KVA, 250A

RH-4625

- IGBT technology for better welding quality, greater welding penetration, reduced energy consumption and increased efficiency
- Unbeatable automatic short circuit current protection, easy ignition, less spark, provides excellent arc strike performance at rust surface
- Run 5mm MMA electrode
- Multi protection of over voltage, over heat, over current and over load protection
- Hot start, anti-stick, less spark, reliable. Ideal welding equipment for entry-level welder
- Equip with 2 volumes (Current, Arc force) for easy and better welding setting
- Digital display provides highly accurate welding
- Professional cooling system in order to increase efficiency and continuance welding

Model	RH-4625
Input voltage	220v
No-Load voltage	87v
Output Current range	10-250A
Max Input Power Capacity	11 KVA
Duty Cycle	60%-80%
Electrode Diameter	1.6-5.0mm
Weight	11Kg
Accessories	Earth clamp+3m cable, Welding clamp+3m cable
