

DC ARC Welding Inverter
400A

RH-4640

- IGBT technology for better welding quality , greater welding penetration, reduced energy consumption and increased efficiency
- Unbeatable automatic short circuit current protection, easy ignition, less spark, provides excellent arc strike performance at rust surface
- Multi protection of over voltage, over heat, over current and over load protection
- Hot start, anti-stick, less spark, reliable. Ideal welding equipment for entry-level welder.
- Digital display provides highly accurate welding
- Professional cooling system in order to increase efficiency and continuance welding

Model	RH-4640
Protection Class	IP21S
Max Input Current	55A
Input voltage	170V-250V
Power Factor	0.73
No-Load voltage	35-50V
Insulation Class	F
Max Input Power Capacity	12KVA
Electrode Diameter	1.6-5.0mm
Accessories	3m×16mm CCC cable with 300A holder 1pc, 2m×16mm CCC cable with 300A earth clamp 1pc, mask 1pc, brush 1pc, Strap 1pc
Duty-cycle (25°C)	100%
Out-put Current Range	20-400A
Rated Out-put Voltage	20.8-30V
