

**Hole Core Bit**  
**50mm**

**RH-5042**

- Precisely positioned diamonds for unmatched drilling performance
- Constant high drilling speed over the entire life of the core bit
- High quality finishing surface
- Designed for the most challenging conditions, the core bit excels in concrete with a high rebar content
- Provided with a hex wrench, make your job more convenient and easier
- The hole saw kit is made of 45# carbon steel with tungsten carbide alloy (YG11C) teeth, high precision, smooth cutting, especially impact resistance, wear resistance
- The optimized tooth design allows for fast drilling speed, and also offers an optimized pilot bit for long life in metal

Model	RH-5042
Hole Saw Size(mm)	50
Blade Material	Tungsten carbide alloy (YG11C)
Body Material	45# carbon steel
Drill bit material	45# carbon steel
Drill Diameter (mm)	8
Drill length (mm)	110
Working Length	70mm
Shank Type	sdsplus
Weight	0.34
Cutting Depth	50.5mm
Operation mode	Dry
