

Tar Spray Gun

RH-6602

- Hand-held blaster with 1000cc capacity cup featuring exclusive air valve design, allowing you to tackle a variety of projects with ease
- Hand-held unit for abrasives or liquids
- Pistol grip design for a comfortable grip
- Reduces over spray and allows you to spray larger surfaces without having to stop
- A light-weight solution to small blasting and sealing jobs
- Aluminum gun body, rust-resistant stainless steel nozzle and solid brass cap for durability and longevity
- The brass needle sand precision air cap, is ideal for a fully automatized and consistent spray pattern
- A low volume of air and a working pressure up to 150 Psi creates a siphon action that draws abrasive from the bottle for an even spray
- The light-weight aluminum body of the suction gun is suited for your workshop and other field locations
