

**Welding Clamp**  
**300A**

**RH-9070**

- Usability and Comfort-Lightweight, ergonomic design to fit properly in a welders hand even in the most confined spaces.
- Maximum Conductivity - Copper alloy jaw to optimize conductivity and strength to improve overall welding
- Usability and Comfort - Lightweight, ergonomic design to fit properly in a welders hand even in the most confined spaces. Insulated handle that is easy and effective to operate in a variety of environments.
- Fully insulated and protected springs, Easy installation with simple tools

Model	RH-9070
Factory Product Name	Electrode Holder
Body material	DMC fiber glass
Jaw material	Iron with copper plated
Dimension	223mm length
Max electrode size	4mm
Max cable size	35mm
Amps/Load capacity	300A
Include	One pressing plate
Supplide in	Color box
