

Electric Hot Knife Foam Cutter 220W

1180

- Electric foam cutter with a powerful 220W motor
- It can heat up quickly within 300 seconds
- The blade holder provides excellent thermal conductivity
- The temperature protection system is automatically activated to prevent overheating when the cutter exceeds a certain temperature.
- It cuts the edges cleanly and leaves no residue
- Suitable for commercial and industrial use and for cutting more materials, including medium and low density foam, nylon rope and nylon bands, lightweight foam, KT plate, polyurethane, polyethylene, EPS, XPS, EPP, EVA, EPE, PU, polyester foam, sponge, rubber
- The power and temperature can be easily controlled via a rotary knob on the top

Model	1180
Power	220W
Voltage	220-240~V
Frequency	50Hz
Temperature Range	120-450°C
Cutting Depth	150mm
Heat-up Time	300Sec
Blade Length	150mm
Blade Material	stainless steel
Blade Holder Material	Q235
Handle Material	PA6+GF30
Dimensions	41*8.5*20.5mm
Weight	1.1Kg
packaging	color box
Accessories	1pc steel
