

Electric heater 2000 W

1190

- Powerful 2000W ceramic heating plate combined with a 250m³/h airflow fan delivers a steady and efficient stream of warm air.
- Operates on 220V single-phase power with three adjustable power levels: low (motor only) at 23W, medium at 1000W, and high at 2000W.
- Heating coverage effectively warms areas up to 16m² (or 40m³).
- Adjustable thermostat with HIGH and LOW settings for precise temperature control.
- Quiet operation thanks to a dynamic 120mm fan that provides maximum airflow with minimal turbulence and noise level of only 45dB.
- Built-in overheat protection automatically shuts off the heater to ensure safety.
- Three power modes (low, medium, high) allow you to enjoy warm air or natural airflow, making it suitable for year-round use.
- Air outlet pitch adjustable up to 90°, directing warm air exactly where you need it.

Model	1190
Voltage	220-240V
Frequency	50-60Hz
Power	2000W
Heating element type	PTC
Material	Steel + Polypropylene (PP)
Usage	Indoor
Dimensions	215 × 140 × 240mm
Net Weight	1.5Kg
Gross weight	1.7Kg
packaging	Color Box
