

**Electric Impact Wrench**  
**900W**

**2035**

- Powerful high-performance 900W motor enables outstanding functionality in fastening with different torques
- Powerful durable clutch system for long industrial usage
- Metal ball cocket joint drive system for easy connection
- High-torque machine with low kick-back torque
- Delivers 350 NM of torque, ideal for fast tightening and loosening of heavy-duty fasteners
- NSK anti-dust ball bearing for more efficiency and higher durability
- Die-cast aluminium housing for optimum heat dissipation and durability
- Ergonomic design enables fatigue-free operations in different industries
- Anti-dust, variable-speed switch for accurate bit starting
- Forward and reverse rotation functions

Model	2035
Power	900W
Drive	1/2inch-12.7mm
Voltage	220V
Frequency	50Hz
No-load RPM	0-2200 RPM
Max Torque	350NM
Bolt Range	M14 to M22
Weight	3.7kg
Supplied in	BMC
Includes	(1) 22mm bit, (1) 24mm bit, (1) pair of carbon brush
