

Pneumatic Drill

10mm

2138A

- High-performance motor maximizes output speed of 1800 RPM for high Performance
- Ergonomic grip design for better maneuverability of the tool
- Reliable heat-treated planetary gear machined form bar stock
- Durable motor design with high balance for precision work without vibration
- Feather trigger can help on precision work
- Durable 3/8 inches (10mm) keyless drill chuck for strength in bit gripping
- Rear exhaust design to minimize the discomfort of exhaust air
- Comfortable thumb finger touch side-mounted forward/reverse switch makes directional changes smooth and easy
- Pistol like grip with finger grooves provides a sturdy yet comfortable grip while performing heavy work
- Ideal for spring work, maintenance of buses & trucks, high volume tire work on trucks & buses, heavy equipment, farm implement work & etc.
- Made in Taiwan
