

Vibrator Shaft 3m

2420-5

- Power Cement Vibrating Immersion rods excel at aiding concrete pouring and formwork to settle correctly, more firmly, faster, and stronger. The vibrations remove excess water, which is essential for removing air bubbles in poured concrete and for leveling curing cement.

Suitable for most concrete construction, and has a wide range of uses.

Concrete Vibrator Needle for removing air bubbles in poured concrete and improving structural strength.

- Strong vibration, low heat generation, low noise, settle concrete quickly, and remove air bubbles

Model	2420-5
Body Material	Iron+rubber
Hose Length	3m
Needle Diameter	35mm
Dimensions	3000*35*35mm
Weight	6.5Kg
packaging	color box
