

Brushless cordless pruner
28 mm

8660

- Our electric pruning shears can cut, clean and flat quickly without damaging branches. The blade is forged from high carbon steel SK5 and driven by brushless motor. It is very sharp and durable. The cutting diameter is 28mm
- The electric trimmer is equipped with two or three 2Ah rechargeable lithium batteries, which have a long battery life
- One battery can be used for 2-3 hours continuously, and can be quickly charged for 1 hours
- Electric trimmers can be used in various gardens, parks, farms, large pastures, orchards, greenhouses, etc., such as vineyard trimmers, tree trimmers, garden trimmers, etc
- The electric trimmer greatly improves the working efficiency and helps users to quickly complete the trimming work. It is light, easy to use, and suitable for any working group, including women and the elderly
