

**Impact Driver Bit Holder**

**20V , 125mm**

**8680**

- The battery angle grinder is equipped with two lithium batteries with 20V 4000mAh capacity, which can be used alternately to extend the usage time and improve the shelf life. The battery capacity display shows you how much energy is still present in the batteries, so that you can replace or charge them in time to avoid any impairment of your working efficiency during use
- Mini angle grinder has a high speed of 2600/8500 rpm, which can quickly remove materials, which saves you time and energy while ensuring reliable and efficient work. High efficiency and low noise make it a durable and powerful tool for a variety of tasks
- This mini angle grinder is equipped with a secure and comfortable spindle lock, which makes it easier to change the sanding head or blades, prevents accidental starting and reduces vibrations and noise; the ergonomic handle design is easy to operate with one hand, and the handy side switches, which are easy to hold and use, maximize the working efficiency
- Our mini flex is equipped with reinforced protection, which prevents debris from injecting the machine and ensuring safe operation. Ventilation holes on the enclosure can effectively dissipate the heat, prevent overheating and extend the life of the machine

Model	8680
Battery Type	Lithium-ion
Battery Capacity	4.0 Ah/20V
Spindle Size	M14
No-Load Speed	2600/8500RPM
Wheel Diameter	125 mm
Dimensions	98x70x304 mm
Weight	1.96Kg (with 1pc battery pack)
packaging	BMC
Includes	2pcs battery packs/1pc charger/1pc Guard/1pc wrench/1pc auxiliary handle
