

Hole Saw Arbor

RH-5251

- Made of heavy-duty steel alloy, in two models fits perfectly a variety hole saws less than 30mm and more than 32mm
- The center drill bit is made of H.H.S material for stable and accurate positioning of the opening position
- Pins lock the saw to prevent over-tightening and prevent threads from stripping
- Hardened material for long thread life
- Fast and easy to engage and disengage hole saw
- Steel construction for added durability
- Works smoothly every time without worry of rusting or corrosion slowing or sticking the operation

Model	RH-5251
