

Locking Plier

RH-1407

- Manufactured from high quality Cr-Mo material for highest resistance during industrial applications
- Nickel coating of the body ensures longer lifetime and less damage during high-pressure jobs
- Advanced design improves performance and convenience
- Induction hardened jaws and teeth according to DIN standard increases abrasion resistance and results in better gripping of different shapes
- Adjusting screw improves the holding pressure and provides maximum locking force
- Hex key adjusting screw tightens to adjust pressure and draw materials together and provides a controlled release
- Included high effective wire cutter mechanism
- Operative trigger release system delivers maximum locking force
- Ergonomic design provides extra comfort and reduce hand fatigue

Model	RH-1407
Product Dimensions	7 inch/180mm
Jaw Thickness	8mm
Jaw Capacity	38mm
Jaw Style	Curved
Jaw Release Lever	Guarded Trigger Release
Wire Cutter	Yes
Material	Cr-Mo
