Test Pen
140mm

RH-2714

- Multi-color electrometric voltage light test pen designed on the basis of Ronix standards for high-efficiency electrical functions
- The rods manufactured from high-quality stainless steel which secures high performance in long-term usage
- Ergonomic non-slip designed handle made from ABS environmental plastic for comfortable grip
- Insulated ABS plastic cover for higher safety during electronic operations
- High-quality replaceable xenon lamp enables high visibility in different situations even in intense light
- Two kinds of applications, one for measuring circuit electrical pen and the other for screwdriver
- Nickel coated tips for perfect fitting in the screw profiles
- Working voltage between 120 to 250V
- Electronic safety resistor secures safety of operation
- Copper cap for more efficiency
- Meets BS, EN & ASDN standards
- Unique Ronix design display color box allows users to select their favorite colors easily

140mm A35 MULTI COLOR

Model	RH-2714
Drive Type	Slot drive
Packing	Display Color box
Rod Material	high quality Quenched and Tempered Alloy steel 40Cr
Product Dimensions	140mm
