

Granite Cutting Disc 180 mm - Segment 11 - German

RH-3552

- Built with high-quality raw materials to guarantee outstanding cutting performance and durability.
- Manufactured through a forging process that ensures faster cutting, longer service life, and a higher level of safety.
- Diamond concentration and quality are perfectly balanced to provide efficient and reliable cutting results.
- Suitable for both dry and wet cutting with a strong bond between the steel body and diamond segments.
- Manufactured in accordance with EN13236 European safety standards for reliable and safe operation.
- The gaps between the diamond segments promote airflow and help dissipate heat generated during cutting for smoother, cooler cuts.

Model	RH-3552
Body Material	Laser-weldable Steel
Style	K168
Maximum RPM	8500RPM
Maximum speed	80m/s
Application	Granite
Tools	Angle Grinder
Number of Teeth	13
Arbor Size	22.23mm
Disc Thickness	1.5mm
Wheel Diameter	180mm
Segment Thickness	2.4mm
Segment Height	11mm
Weight	0.29Kg
