

**Turbo Granite Cutting Disc 230 mm -
Segment 17 - German**

RH-3562

- Built using high-grade materials to ensure optimized cutting behavior and reliable performance.
- Manufactured through a forging process for faster cutting, extended lifespan, and enhanced safety.
- Optimal balance of diamond concentration and quality ensures efficient and precise cutting.
- Suitable for both dry and wet cutting with a strong bond between steel body and diamond segments.
- Complies with EN13236 standards to ensure user safety and product reliability.
- Segment gaps promote airflow and reduce heat buildup for smoother, cooler cuts.

Model	RH-3562
Body Material	Laser-weldable Steel
Style	K116
Maximum RPM	6650RPM
Max Speed	80m/s
Application	Granite
Tools	Angle Grinder
Number of Teeth	15
Arbor Size	22.23mm
Disc Thickness	2mm
Wheel Diameter	230mm
Segment Thickness	2.8mm
Segment Height	17mm
Weight	0.71Kg
