

**Zirconium Grinding Flap Disc**

**115mm**

**RH-3770**

- The high-performance flap disc offers optimum grinding performance with a longer service life and a clean grinding pattern
- Due to the high-quality workmanship, the grinding disc is particularly resistant to wear and very durable
- Due to the high stock removal rate, the flap disc is ideally suited for grinding steel, cast iron, aluminium as well as other metals and alloys
- The flap discs diameter 115 mm with the grain P40 in brown are compatible with many common cutting grinders and angle grinders with a 22.23 mm holder
- Flap discs are particularly suitable for intermediate and coarse sanding
- Application include the processing of welds, deburring and de-rust as well as the preparation for painting bodies and machines or the grinding of wooden surfaces such as parquet and wooden furniture

Model	RH-3770
Diameter	115mm
Inside diameter	22.23mm
Grit material	Zirconia oxide
Grit type	40#
Max Speed	13300RPM
Weight	0.08283Kg
Supplied in	Color box
