

Zirconium Grinding Flap Disc
115mm

RH-3773

- The high-performance flap disc offers optimum grinding performance with a longer service life and a clean grinding pattern
- Due to the high-quality workmanship, the grinding disc is particularly resistant to wear and very durable
- Due to the high stock removal rate, the flap disc is ideally suited for grinding steel, cast iron, aluminium as well as other metals and alloys
- The flap discs diameter 115 mm with the grain P100 in brown are compatible with many common cutting grinders and angle grinders with a 22.23 mm holder
- Flap discs are particularly suitable for intermediate and coarse sanding
- Application include the processing of welds, deburring and de-rust as well as the preparation for painting bodies and machines or the grinding of wooden surfaces such as parquet and wooden furniture
