

Aviation Snip

RH-3901

- Forged and hardened chrome vanadium steel blades improve tool's life
- Professional aviation snip with a high-leverage design and serrated-edge blade for efficient cutting
- Easily cuts through thin cold-roll steel, up to 1.2mm and stainless steel, up to 0.7mm
- Superior Design prevents tears at the end of cuts by controlling the blade bypass and minimizes folding and burrs
- Comfortable, ergonomic TPR handle ensures a secure hold and precise cuts
- Excellent levers' power increases performance effectiveness
- Its latch, locks the tool shut when it is not in used, to protect the blade
- One-handed auto release
- Multipurpose snips with compound cutting leverage
