

Pressure Tank 24L-10Bar

RH-4070

- Max pressure: 10 bar
Schrader valve pre-pressure: 2-2.5 bar
- Pressure tank outside have painting
- Both the diaphragm of the Pressure Wave tanks are reinforced in specific wear areas to enhance longevity and reliable performance
All internal parts including the air valve are rounded to prevent piercing of the diaphragm in extreme conditions
- The pressure boosting tank optimizes water pump performance, ensuring a steady and consistent water flow, especially during peak demand periods

Model	RH-4070
Max Pressure	10Bar
Style	vertical
Capacity	24L
Tank Material	carbon steel
Diaphragm Material	EPDM
Tank body thickness	1.2mm
Connection	1inch
Weight	5.5Kg
packaging	carton
Accessories	/
