

DC Arc Welding Inverter

9.4 KVA, 200A

RH-4600

- IGBT technology for better welding quality, greater welding penetration, reduced energy consumption and increased efficiency
- Unbeatable automatic short circuit current protection, easy ignition, less spark, provides excellent arc strike performance at rust surface
- Run 5mm MMA electrode
- Multi protection of over voltage, over heat, over current and over load protection
- Hot start, anti-stick, less spark, reliable. Ideal welding equipment for entry-level welder.
- Equip with 2 volumes (Current, Arc force) for easy and better welding setting
- Digital display provides highly accurate welding
- Professional cooling system in order to increase efficiency and continuance welding

Model	RH-4600
Input voltage	220v
No-Load voltage	70v
Output Current range	10-200A
Max Input Power Capacity	9.4 KVA
Duty Cycle	60%
Electrode Diameter	1.5-5.0mm
Weight	8.5Kg
Supplied In	color box
Accessories	2.5 earth cable +clamp; 2.5 electrode cable +holder
