

DC Arc Welding Inverter

180A

RH-4618

- IGBT technology for better welding quality, greater welding penetration, reduced energy consumption and increased efficiency
- Unbeatable automatic short circuit current protection, easy ignition, less spark, provides excellent arc strike performance at rust surface
- Run 4mmMMA electrode
- Multi protection of over voltage, over heat, over current and over load protection
- Hot start, anti-stick, less spark, reliable. Ideal welding equipment for entry-level welder.
- Equip with 2 volumes (Current, Arc force) for easy and better welding setting
- Digital display provides highly accurate welding
- Professional cooling system in order to increase efficiency and continuance welding

Model	RH-4618
Input voltage	220V
No-Load voltage	65V
Output Current range	10-180A
Max Input Power Capacity	8.3KVA
Duty Cycle	60%
Electrode Diameter	1.6 - 4.0
Supplied In	BMC
Accessories	Earth clamp+2m cable, Welding clamp+3m cable
