

Inverter Welding Machine

20-200A

RH-4671

- IGBT technology for better welding quality , greater welding penetration, reduced energy consumption and increased efficiency
- Unbeatable automatic short circuit current protection, easy ignition, less spark, provides excellent arc strike performance at rust surface
- Run 1.6-5.0 mm MMA electrode
- Multi protection of over voltage, over heat, over current and over load protection
- Hot start, anti-stick, less spark, reliable. Ideal welding equipment for entry-level welder
- Equip with volume (Current) for easy and better welding setting
- Digital display provides highly accurate welding
- Professional cooling system in order to increase efficiency and continuance welding

Model	RH-4671
Input Voltage	220-240V
No-Load Voltage	65±5V
Output Current Range	20-200A
Rated Output Voltage	MMA-28V MIG-24V
Max Input Power Capacity	MMA-10KVA MIG-7KVA
Max Input Current	MMA-44.5A MIG-34A
Power Factor	0.65
Duty Cycle	25°C 100%
Insulation Class	F
Protection Class	IP21s
Welding Wire Material	E71T-GS
Diameter of Welding Wire	0.6mm, 0.8mm, 1.0mm
Wire Spool	1Kg or 5Kg

Length Mig Torch	2.8m Torch
Welding Speed	2-12m/min
Type of Used Gas	CO2 or Mixde Gas
Electrode Diameter	0.8 mm-1.0mm
Weight	5.5Kg
Packaging	Color Box
Accessories	1. MIG Torch 2.8m 2.Earth Clamp Cable Length:1.5M DKJ 35-50 TUV H01N2-D 1×25mm ² 3.Cable Length:2 M DKJ 35-50 TUV H01N2-D 1×25mm ² 4.Brush Hammer 5.Welding Helmet
