

Ratchet Steel Jack

3T

RH-4947

- The precisely machined gear box with optimal gear ratio ensures a minimum of effort and smooth operation
- The load can be positioned either on the head or the claw
- By turning the operating lever the Jack moves smoothly and conveniently up and down along the rack
- The load is held securely in position. Inside the load brake the axial brake pressure is generated by the load itself, it is proportional to the size of the load.
- The self-locking, anti-kickback operating lever reduces the risk of injuries.

Load Capacity	3000Kg
Maximum Lifting Height	730mm
Minimum Lifting Height	70mm
Stroke	350mm
Material	Q235
Net Weight	21.2Kg
Gross Weight	22Kg
Packaging	Carton
