

Engine Stand Jack
360 Degree

RH-4951

- The upgraded H-shaped base takes the place of the traditional T-shaped base, making the engine stand even more stable
- The M12X55 mm long hex head bolts on the mounting arms provide a tight, secure grip on your engine blocks, eliminating any worry of loosening during maintenance
- The adjustable and 360 degree rotatable mounting arms ensure you get the job done efficiently and effectively
- Equipped with 3 pcs 360 degree universal wheels (2 of which has a brake), this engine stand can be easily moved and positioned exactly where you need it
- Its foldable design allows it to take up minimal space, with a width of just 375 mm when folded

Model	RH-4951
Material	Q235
Handle type	Steel
Load capacity	1500LBS (680 Kg)
Design	H-shaped
Finish	Painting
Wheel material	HT150
Net weight	33.5kg
Gross weight	35.3kg
Stand dimensions	870mm×820mm×860mm
Wheel diameters	76×89×101mm
Head rotate	360Degree
