

M2 Drill Bit

RH-5352

- HSS Material, industrial high speed steel with good wear resistance and durability
- Straight shank for standard drill chucks and collet to hold firmly, assuring accurate centering
- Helical flute for swarf to easily get out; standard 118-degree point configuration is ideal for general purpose drilling applications
- Titanium coating increases the durability of the drill bit for long life drilling
- Multi-purpose use: drills accurate and clean holes in thinner, low hardness of wood and soft-metal hole processing, for home use and light tasks

Model	RH-5352
Size	3.5mm
Material	High speed steel
Standard	DIN 338
Supplied in	Ronix plastic box
