

Jig saw blade

RH-5610

- Fully hardened, Chrome vanadium & Bi-metal precision teeth that stay sharper longer than the other blades in its class
- T-Shank design allows easy blade mount & remove, maximal grip and ongoing stability
- 6 to 23 TPI progressive tooth design secures high endurance, high speed cuts and longer life in varied thicknesses of different material
- Ideal for accurate, fast, straight & rough cuts used by professional carpenters, DIYs, home improvers, electricians, general contractors, roofers, plumbers, frame, drywall & maintenance workers, and general industrial wood workers on all soft wood like cedar, fir, pine and redwood, in addition to engineered wood like plywood, laminate, glulam, particle board, fiberboard, oriented strand board, plastic and construction lumber
And all Metal Working industries

Model	RH-5610
Blade Material	HCS(sk5)
Teeth Per Inch(TPI)	4mm-6TPI
Cutting Thickness Range	5-50mm
Shank Type	T shank
Cutting Material	wood
Working Length	75
Total Length	100
