

Welding mask

0.38Kg

RH-9009

- The molded-in glass holder features a 100 x 60 mm aperture for optimal viewing while welding.
- The Shade 9 welding lens provides clear vision and safe UV/IR protection
- Thermoplastic Noryl construction makes the shell very resistant to high heat.
- The design is curved to deflect sparks & spatter, and seamless to prevent them from catching and burning through.
- The unique design extends downwards to help block smoke and fumes, and to protect the front of the throat
- The telescoping lid flips up for easy checking of the weld, repositioning of the material etc
- The lid also seals against light-leak to enhance safety and performance.
- The deeply offset, pliable 3-C headgear
- The unique free-floating arms balance
- The Tigerhood helmet's interior is roomy to promote proper air circulation and help clear any smoke & fumes that seep in.
- The color is molded-in to prevent chipping, peeling or fading.

Model	RH-9009
Size	305x220x190mm
