Premium Quality

## CAMERA POINT FINDER LASER DISTANCE METER 100m

### RH-9390

[www.ronixtools.com](http://www.ronixtools.com)

## TECHNICAL SPECIFICATION

Model	<b>RH-9390</b>
Battery Type	3×AAA NI-MH Rechargeable Batteries
Battery Capacity	900mAh
Laser Beam Color	Red
Material	ABS+RUBBER
Dimension	115/49/26mm
Distance	100m
Measurement Accuracy	±2mm
Weight	0.14Kg
Include	Pouch×1, QC Certificatex1 USB Cable×1, Battery×1, Wristband×1

## PART LIST

## ■ MEASURE BUTTON

Activate the measuring mode, short press to measure, long press to Continuous measure.

## ■ MENU BUTTON

Press to change measuring mode: Area/Volume/Pythagorean two points/Pythagorean three points/Auto level/Auto height/ Point to point/ Trapezium measurement (1)/Trapezium measurement (2)/ Triangle Area measurement/Circular Area measurement/ cylindrical Volume measurement/Stake out.

## ■ SET BUTTON

Press the button to select Bluetooth, Unit Change, Reference, 3D level, Screen rotation, History and Time-delayed measurement.

## ■ LASER EMITTER ICON

## ■ DISPLAY SCREEN

Mode selection display.

## ■ CAMERA

Press the button to activate the camera, press again to switch between zoom in or out.

## ■ ADD/PREVIOUS

## ■ SUBTRACT/NEXT

## ■ POWER BUTTON

Long press to switch ON/OFF, short press to return to single measurement.

## **BATTERY COMPARTMENT TRIPOD HOLE**

### **■ SAFETY INSTRUCTION**

The safety instructions should be read through carefully before the product is used for the first time.

#### **WARNING:**

- a. the device is categorized into Class 2 laser product. **DO NOT** stare at laser directly or shoot at others or it will cause damage to eyes.
- b. The product is in accordance with strict standards and regulations through the development and manufacturing, but still can't entirely exclude the possibility of interference to other devices, may cause discomfort to human and animals.
  - Please **DO NOT** use this product under explosive or corrosive environment.
  - Please **DO NOT** use this product near medical devices.
  - Please **DO NOT** use this product on the plane.

### **■ BATTERY INSTALLATION AND INSTRUCTIONS**

Press and slide the cover toward the rear of the body to open the battery door.

Insert 3xAAA  
Rechargeable NI-MH batteries.  
Observing correct polarity.

After the battery is placed, cover and hold the battery door, press and slide to the top, the cover can be sealed.

The product uses rechargeable NI-MH batteries. Please use provided USB cable while charging. The computer can also be used to charge, but this takes more time.

**WARNING:**

When use dry batteries, please DO NOT use USB to charge. While charging, the device may heat up, this is normal, and will not affect the product performance and lifetime. Please unplug the charger and take off the batteries when not in use.

## DISPLAY SCREEN

## 1. BLUETOOTH

To select , then press  to activate or deactivate the Bluetooth remote control the measurement and data transmission by connecting with App.

When the icon  turns grey, the Bluetooth shut off.

## 2. MEASURING UNIT

To select , then press  to change the units (m/ft/in/ft+in)

## 3. MEASURING REFERENCE

To select , then press  to change the reference (Front/Tripod/Rear), Rear is the default reference.

## 4. 3D LEVEL

To select , then press  to enter 3D level function.

## 5. DISPLAY ROTATION

To select , then press  to confirm, it will automatically switch to landscape display when the device placed horizontally.

## 6. MEMORY

To select , then press  to confirm, then press  or add/subtract to check the records, press  to delete the record selected.

## 7. CONSTANT SETTINGS

To select , then press  to confirm, press  to move the cursor among the digits, adding or subtracting the value via   button. The measuring results will automatically add/subtract that

constant value.

## 8. TIME DELAYED MEASUREMENT

To select , then press  to confirm, the device shall start measuring after 5 seconds.

### ■ MEASURING INTERFACE:

### ■ SUMMARY LINE

## OPERATION INSTRUCTIONS

The Single Distance Measurement prompt when it is switched ON. Press  to change the measuring mode, the red indicating the current measuring line, and distance data are displayed in Red, measured data marked in Grey, the summary line displayed in Green.

The measuring data should be different due to different reference settings.

### ■ SINGLE DISTANCE MEASUREMENT

The device will come to Single Distance Measurement  when it is switched ON. Press  after aiming at target to get result in summary line.

### ■ CONTINUOUS MEASUREMENT

The Continuous Measurement allows the user to measure the Maximum or Minimum distance from a fixed measuring point. Press and sweep slowly the laser back and forth and up and down over the desired target point. The value for maximum and Minimum distances are indicated in the display as well as the last

measured value marked in green.

You can choose Max or Min value according to your needs.

## ■ AREA MEASUREMENT

Press to select Area Measurement via , according to reminding of the red line, press to get the distance for 1<sup>st</sup> line (e.g., Length), press according to the reminding line again to get the distance of 2<sup>nd</sup> line (e.g., Width), the Area is calculated and displayed in the summary line

## ■ VOLUME MEASUREMENT

Press to select Volume Measurement via according to reminding of the red line, press to get the distance for 1<sup>st</sup> line (e.g., Length), press again for 2<sup>nd</sup> line (e.g., Width), press third time for 3<sup>rd</sup> line (e.g. Height), the Volume is calculated

and displayed in the summary line.

#### ■ PYTHAGORAS (2-POINT)

Press  to select Pythagoras via  according to reminding of the red line, press  to get the distance of 1<sup>st</sup> line, change to the horizontal direction of the object from the fixed measuring point, press  again to get the distance of 2<sup>nd</sup> line, the result is displayed in the summary line.

### ■ PYTHAGORAS (3-POINT)

Press  to select Pythagoras ① via  according to reminding of the red line, aiming at 1<sup>st</sup> target point, press  to get the distance of 1<sup>st</sup> line, change to the horizontal direction of the object from the fixed measuring point, press  again to get the distance of 2<sup>nd</sup> Line, move to the 3<sup>rd</sup> target point, press  to get the distance of 3<sup>rd</sup> line, the result is displayed in the summary line.

### ■ PYTHAGORAS (3-POINT) (2)

Press  to select Pythagoras ② via  according to reminding of the red line, aiming at 1<sup>st</sup> target point, press  to get the distance of 1<sup>st</sup> line, change to the horizontal direction of the object from the fixed measuring point, press  again to get the distance of 2<sup>nd</sup> Line, move to the 3<sup>rd</sup> target point, press  to get the distance of 3<sup>rd</sup> line, the result is displayed in the summary line.

### ■ AUTO LEVEL MEASUREMENT

Press  to select Auto level Measurement via  according to reminding of the red line, press  to get the distance of hypotenuse, vertical and horizontal lines, the result is displayed in line accordingly.

### ■ AUTO HEIGHT MEASUREMENT

Press  to select Auto Height Mode , according to reminding of the red line, press  to get the distance for 1<sup>st</sup> line; press

 again for 2<sup>nd</sup> line, then you can get vertical height displayed in summary line.

### POINT TO POINT (P2P) MEASUREMENT

Follow the instruction: “To set the measuring reference for the center point of rotation, wait for stable performance before operating”, hold the device still and wait until the instruction icon disappear. According to reminding of the red line, press  to get the distance to 1<sup>st</sup> laser point, move the device from the fixed measuring point, press  again to get the distance to 2<sup>nd</sup> laser point, the distance between two points is displayed in the summary line.

## TRAPEZIUM MEASUREMENT

Press  to select Trapezium Measuring mode , according to reminding of the red line, press  to get the distance for 1<sup>st</sup> line; press  according to the reminding line again to get the distance of 2<sup>nd</sup> and 3<sup>rd</sup> line, meanwhile, the last line shall be displayed in the summary line.

## TRAPEZIUM MEASUREMENT

Press  to select Trapezium Measuring mode , according to reminding of the red line, press  to get the distance for 1<sup>st</sup> line; taking the fixed measuring point as center then rotate the meter aiming at next target, press  to get the distance of 2<sup>nd</sup> line; The angle between the diagonal edge and the horizontal edge, the length of right angle side, the length of diagonal edge and hypotenuse shall be displayed accordingly on screen.

## ■ TRIANGLE AREA MEASUREMENT

Press to select Triangle Measuring mode according to reminding of the red line, press to measure the length of the three lines of the triangle ①②③, the result of area shall be displayed on screen.

### ATTENTION:

if the Triangle could not be composed by those three measured lines, then outputs error.

## ■ CIRCULAR AREA MEASUREMENT

Press  to select Circular Area Measuring mode (S), according to reminding of the red line, press  to get the diameter, then area and circumference shall be automatically output on the screen.

## ■ CYLINDER VOLUME

Press  to select Cylinder Volume Measuring mode (V), according to reminding of the red line, press  to get the diameter and height of the cylinder, the device will automatically calculate the area and volume, and display on screen.

## ■ STAKE OUT

Press  to select Stake out , press  to move the cursor and select the corresponding number, press   to add/subtract the value until the desired distance is reached. Press  and start Stake out measurement. The green value would be the distance in real time. You can move the device forward or backward according to the red arrow, when approaching the target, the instrument starts buzzing.

The X1/X2/X3 well below or above the red arrow stands for the order of data group.

## ■ ADD/SUBTRACT

Under the mode of single measurement, Area and Volume measurement, press  or  to make add/subtraction calculations on the basis of previous record, the result is displayed in the summary line.

## ■ CAMERA

Under any measurement mode, when the laser point cannot be

confirmed, press  to locate the target in the image. Press  to zoom in/out the image and press the  when you confirm the target, the display will automatically switch to measuring mode, the result will be displayed at the bottom of the line.

## ■ BLUETOOTH APP DOWNLOAD

Users need download “Joyplan” App on mobile phone to use Bluetooth.

Follow this link : <https://www.zbjsaas.com/joyPlan/page>

## ■ ERROR CODE

All errors or failures will be shown as codes. The following table explains the meaning of codes and solutions.

Code	Description	Solution
204	Calculation Error	Refer to user manual, repeat the procedures.
208	Excessive Current	Please contact your Distributor
220	Low Battery	Replace Batteries or Charge the Batteries
255	Received Signal too Weak or Measuring Time too Long	Change Target Surface
256	Received Signal too Strong	Change Target Surface
261	Out of the Range of measurement	Select the measurement distance within the range of measurement.
500	Hardware Error	Switch on/off the Device Several Times. If the Symbol Still Appears, Please Contact your Dealer for Assistance.
